ESPEC CORP.

Financial Results for Q1 of FY2026
(Fiscal Year Ending March 31, 2027)

August 21, 2026

FY2026 First Quarter Financial Summary

- In terms of orders received, orders were strong in the AI semiconductor field and satellite communications field, the target markets of the medium-term management plan, while Europe and South Korea also recovered. Orders received increased substantially compared with the same period last year and the forecast.
- While net sales increased from the same period last year, the timing of recording sales from large orders for environmental test chambers and energy device equipment was postponed to Q2 due to customers' circumstances, causing net sales to fall below forecast.
- In terms of operating profit, although SG&A expenses increased in line with growth in orders received, operating profit increased year on year due to higher revenue, but fell below forecast mainly due to the postponement of the timing of recording sales in the Equipment Business.

	Year on Year		Comparison with Forecasts	
Orders Received	Increase	Orders increased in the Equipment Business (environmental test chambers, energy device equipment), while orders decreased in the Service Business (laboratory testing services) and the Other Business.	Above	Orders exceeded forecast in the Equipment Business (across all product categories) and the Other Business, but fell short in the Service Business, mainly due to laboratory testing services.
Net Sales	Increase	Net sales increased in the Equipment Business (environmental test chambers) and the Other Business but decreased in the Service Business (laboratory testing services).	Below	All businesses were below forecast. The Equipment Business fell short of forecast mainly because the timing of recording sales from large orders was postponed to Q2, while laboratory testing services in the Service Business fell short.
Operating Profit	Increase	Operating profit rose in the Equipment Business due to higher revenue but declined in the Service Business mainly due to lower revenue from laboratory testing services. The loss in the Other Business narrowed.	Below	Operating profit fell short of forecast mainly due to the postponement of the timing of recording sales in the Equipment Business to Q2, and lower revenue from laboratory testing services.
Profit Attributable to Owners of Parent	Increase	Profit increased due to higher operating profit.	Below	Profit fell below forecast because operating profit fell short of forecast.

■ Shareholder returns Dividend forecast: Interim ¥45, Year-end ¥70, Annual ¥115 Payout ratio: 41.2%
Share repurchases by the Company: Completed the acquisition of 900,000 shares for ¥3.2 billion from November 14, 2025 to July 30, 2026
Announced the repurchase of up to 1,300,000 shares (6.07% of total shares outstanding) for a total of up to ¥6.0 billion from August 7, 2026 to July 31, 2027

Summary of Profits and Losses

(Millions of yen)	FY2025 1Q Results	FY2026 1Q Results	Year on Year

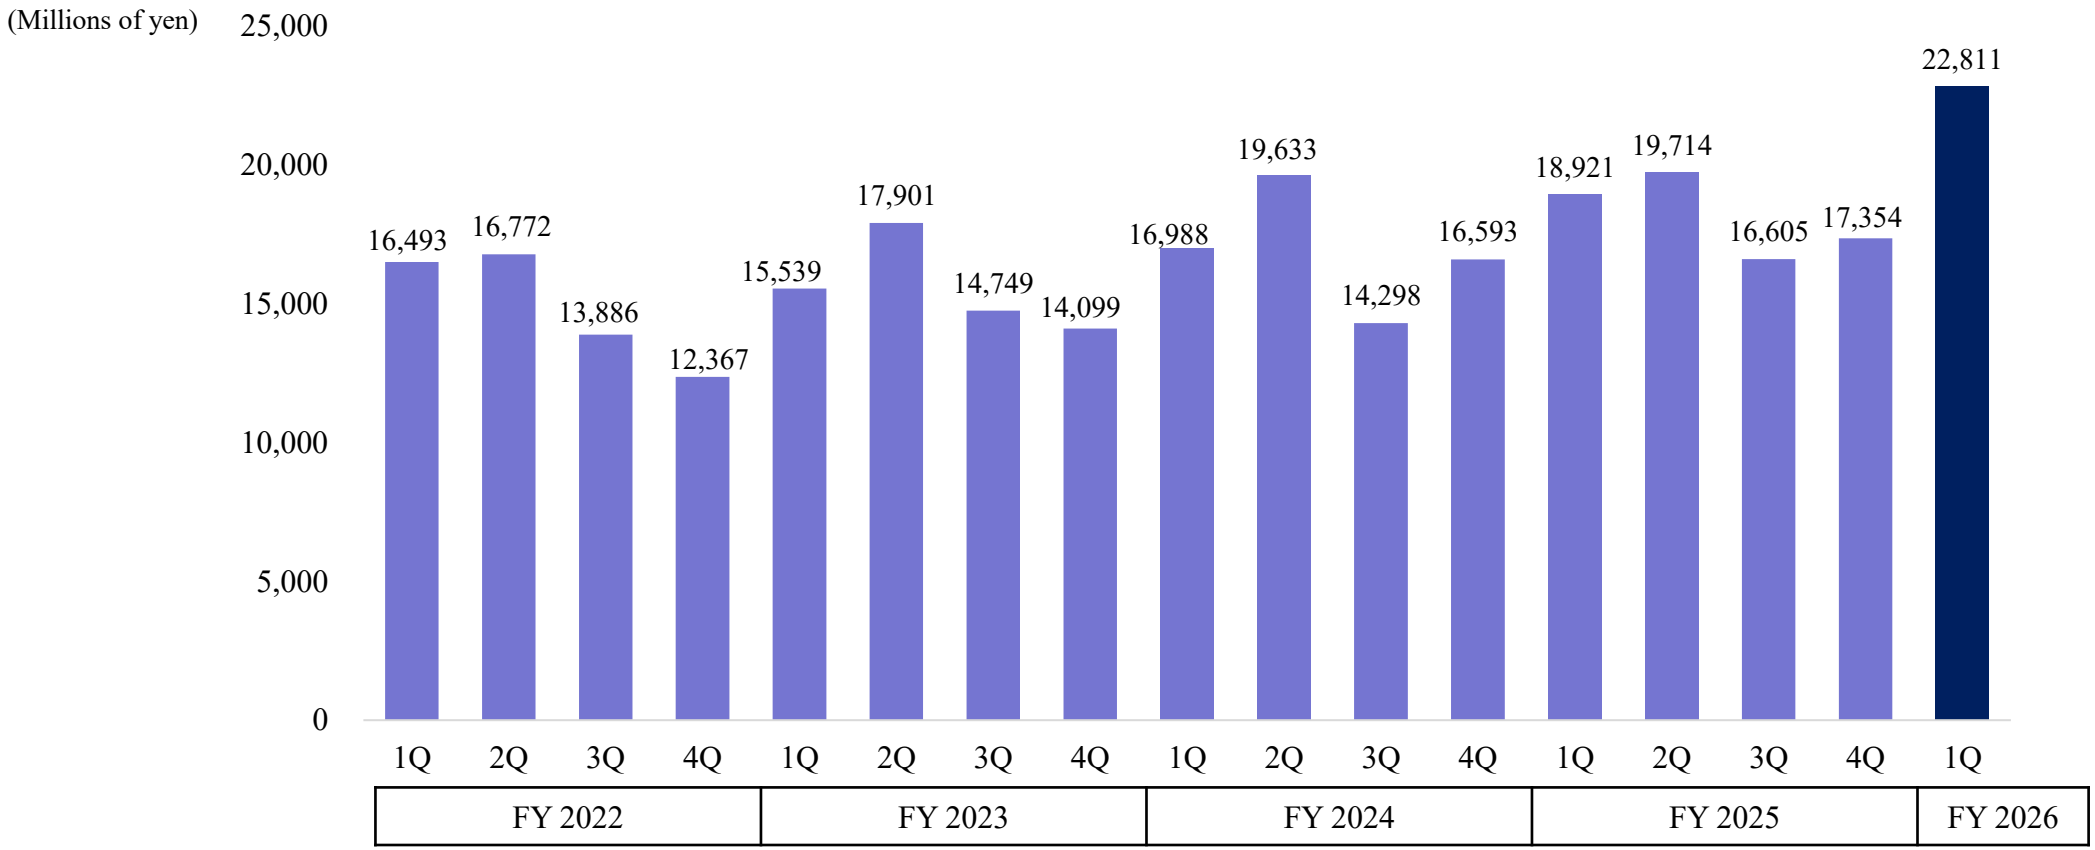
	Operating Profit	335	382	+14.1%
	Profit Ratio	2.7%	2.7%	±0pt

Trends in Orders Received per Quarter

Orders received were strong in the AI semiconductor field and satellite communications field (up approx. 20% year on year in the target markets). By area, North America and China performed strongly, while Europe and South Korea also recovered. Quarterly orders received increased significantly, exceeding ¥20.0 billion for the first time.

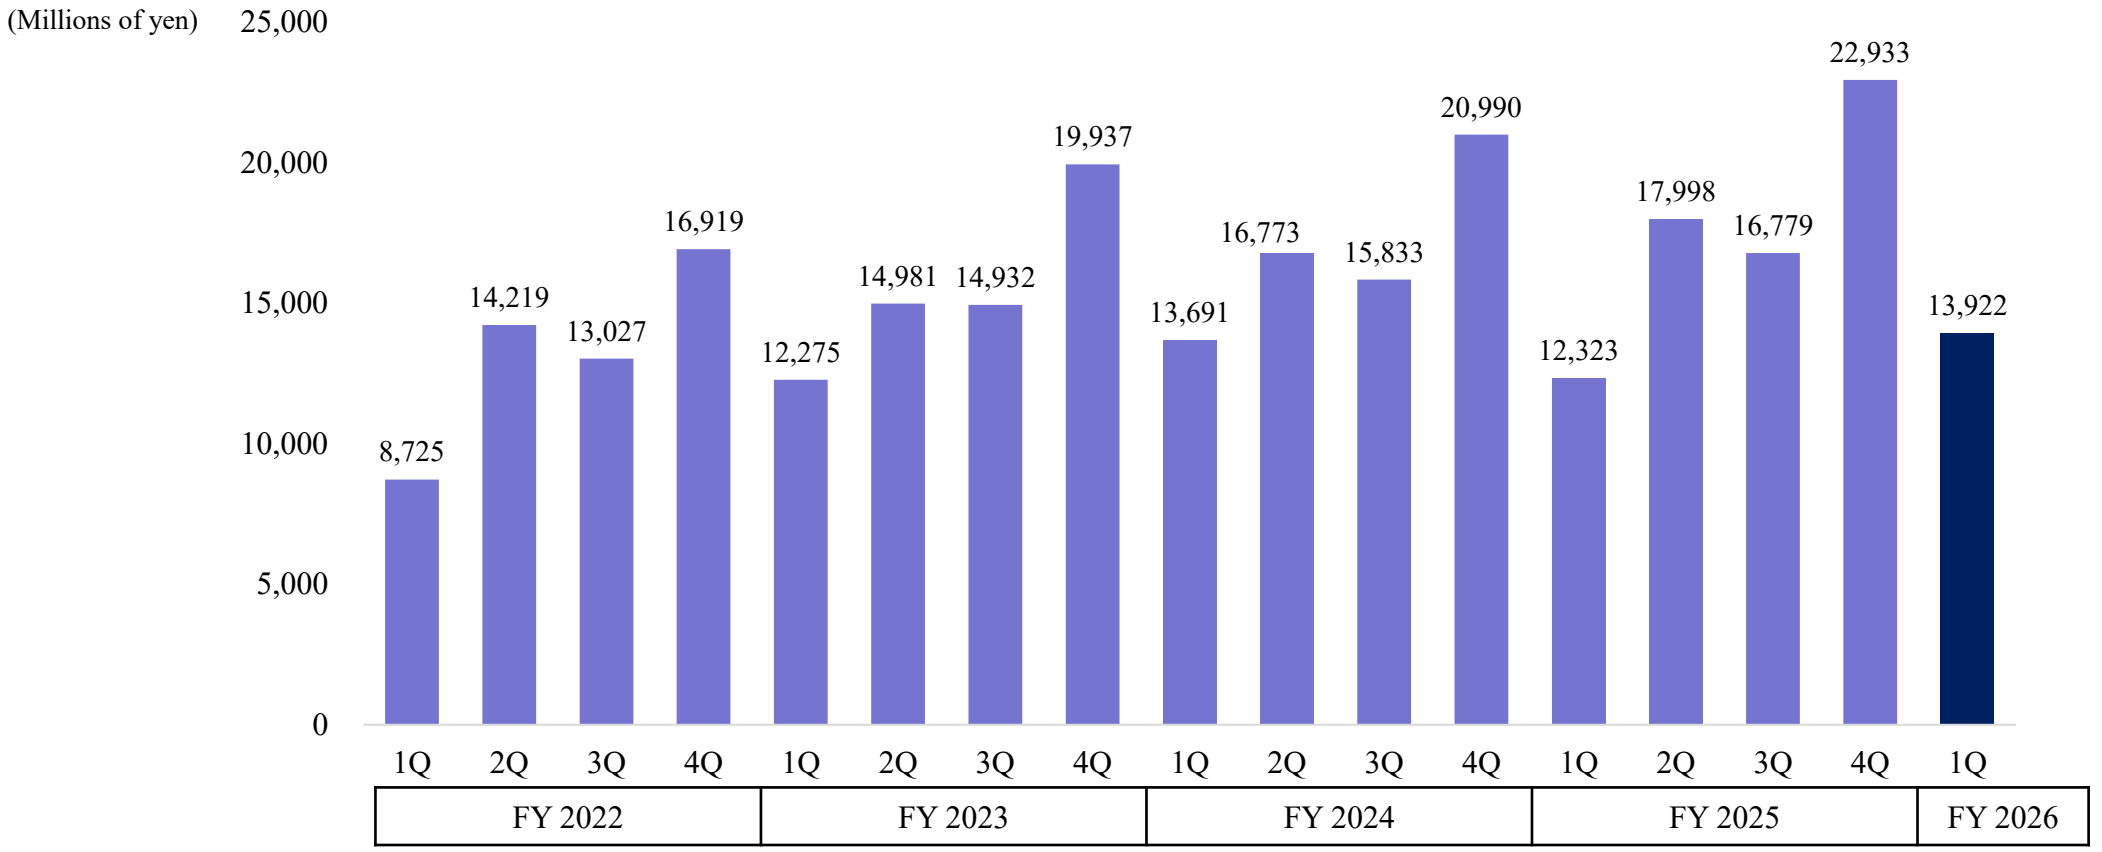
Trends in Orders Received per Quarter



Trends in Orders Received per Quarter

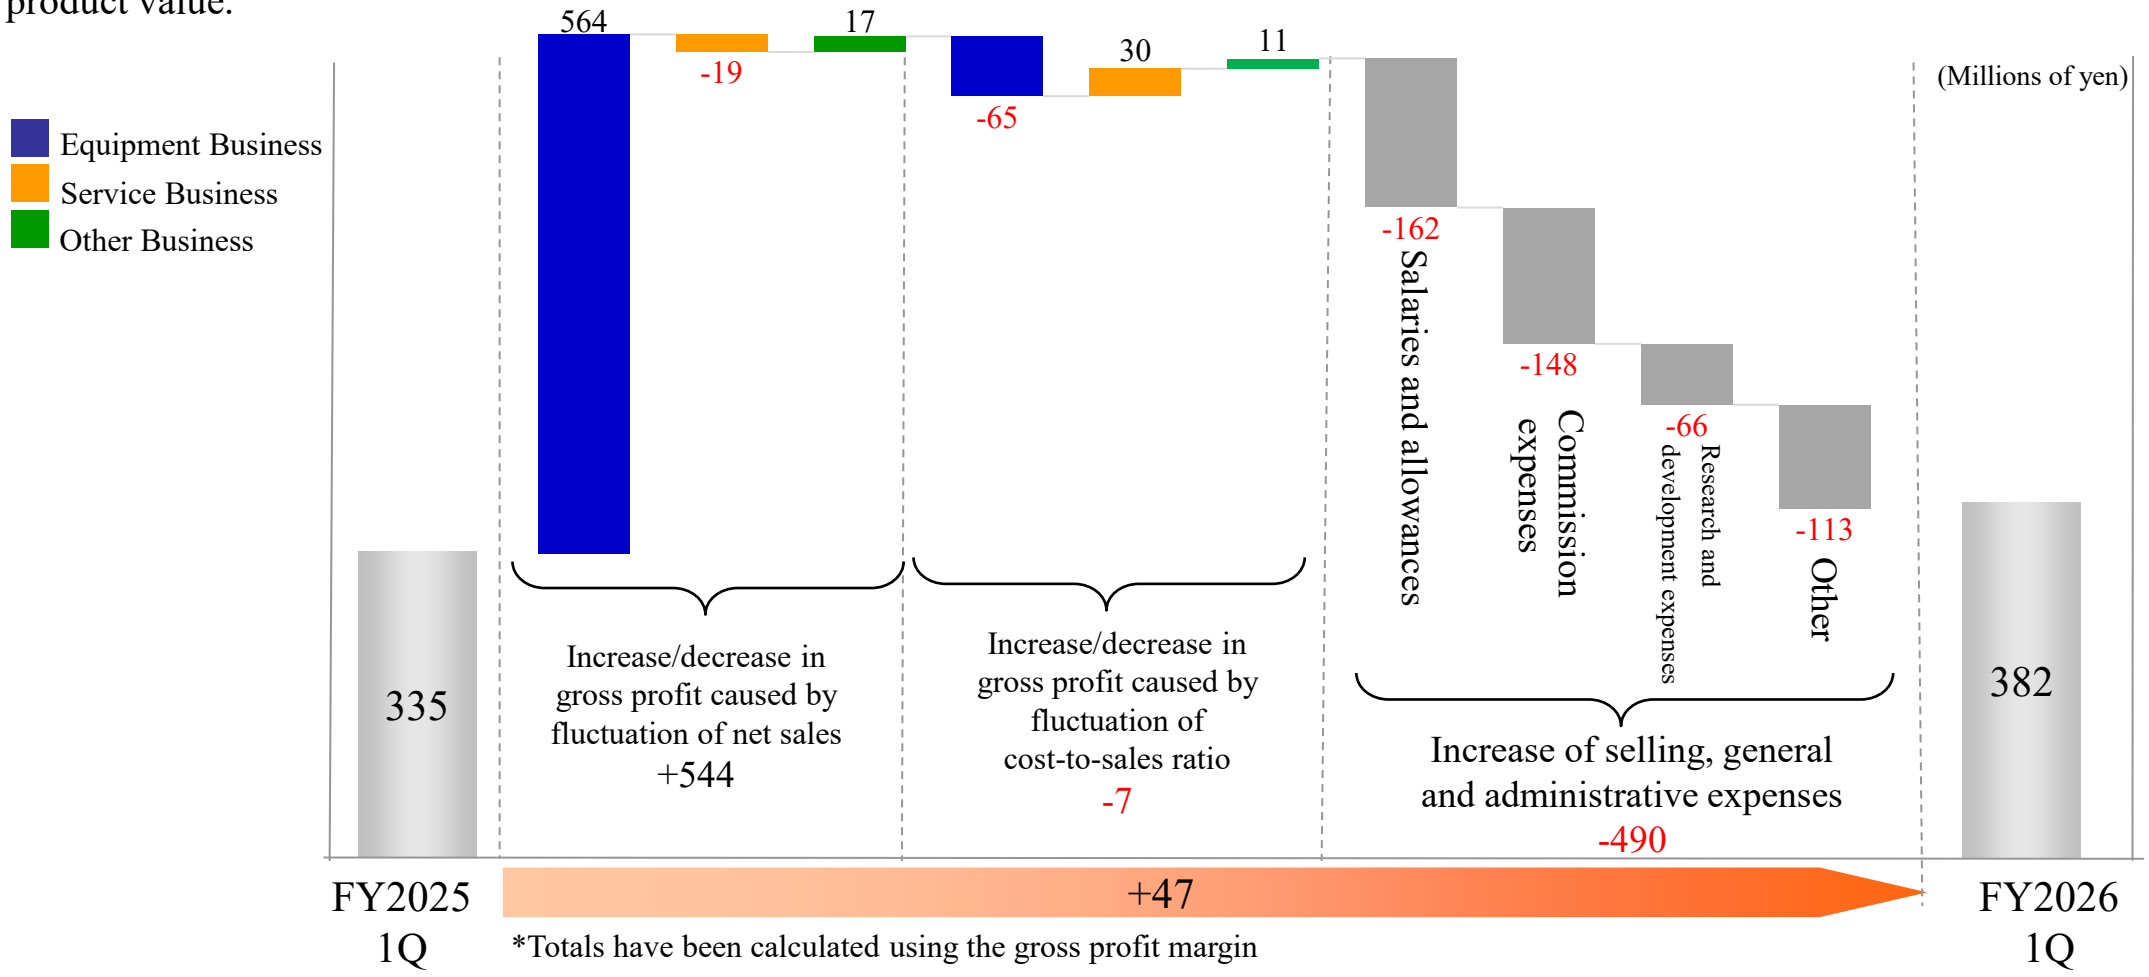
Net sales increased year on year, despite the postponement of the timing of recording sales from large orders for environmental test chambers and energy device equipment to Q2, mainly due to customers' circumstances.

Trends in Net Sales per Quarter



Analysis of Operating Profit Increase and Decrease Factors

- In the Equipment Business, operating profit increased due to higher revenue, although the cost of sales ratio deteriorated primarily in the China market.
- In the Service Business, operating profit decreased due to lower revenue from laboratory testing services, although profitability improved by revising technical support fees for after-sales services.
- SG&A expenses increased due to higher activity costs resulting from growth in orders received and expanded R&D expenses aimed at enhancing product value.



Equipment Business

(Millions of yen)	FY2025 1Q Results	FY2026 1Q Results	Year on Year
Orders Received	15,755	20,341	+29.1%
Net Sales	10,344	11,963	+15.7%
Operating Profit	418	480	+14.8%
Profit Ratio	4.0%	4.0%	±0pt

Environmental Test Chambers

- In Japan, orders received for highly versatile standardized products and customized products remained mostly unchanged from the same period last year. Net sales decreased due to the postponement of the timing of recording sales from large orders to Q2.
- Overseas, orders received significantly increased year on year in North America and China, and also increased in Europe, South Korea, and Southeast Asia. Net sales increased in North America, China, Southeast Asia, and Taiwan, but decreased in South Korea.

Energy Device Equipment

- Orders received increased year on year as orders were acquired for EV battery charge-discharge evaluation systems.
  Net sales decreased due to the postponement of the timing of recording sales from large orders to Q2.

Semiconductor Equipment

- Although testing demand was firm, orders received and net sales both decreased in Q1.

Service Business

(Millions of yen)	FY2025 1Q Results	FY2026 1Q Results	Year on Year
Orders Received	2,266	2,077	-8.3%
Net Sales	1,832	1,763	-3.8%
Operating Profit Profit Ratio	-41 -2.3%	-74 -4.2%	- -1.9pt

After-Sales Service and Engineering

- Both preventive maintenance services and repair services remained firm, with increases in both orders received and net sales year on year.

Laboratory Testing Services and Facility Rentals

- In laboratory testing services, orders received and net sales both decreased year on year due to the impact of restrained investment and changes in development plans in the automotive sector.

Other Business

(Millions of yen)	FY2025 1Q Results	FY2026 1Q Results	Year on Year
Orders Received	1,025	531	-48.1%
Net Sales	256	330	+29.1%
Operating Profit Profit Ratio	-41 -16.4%	-20 -6.2%	- +10.2pt

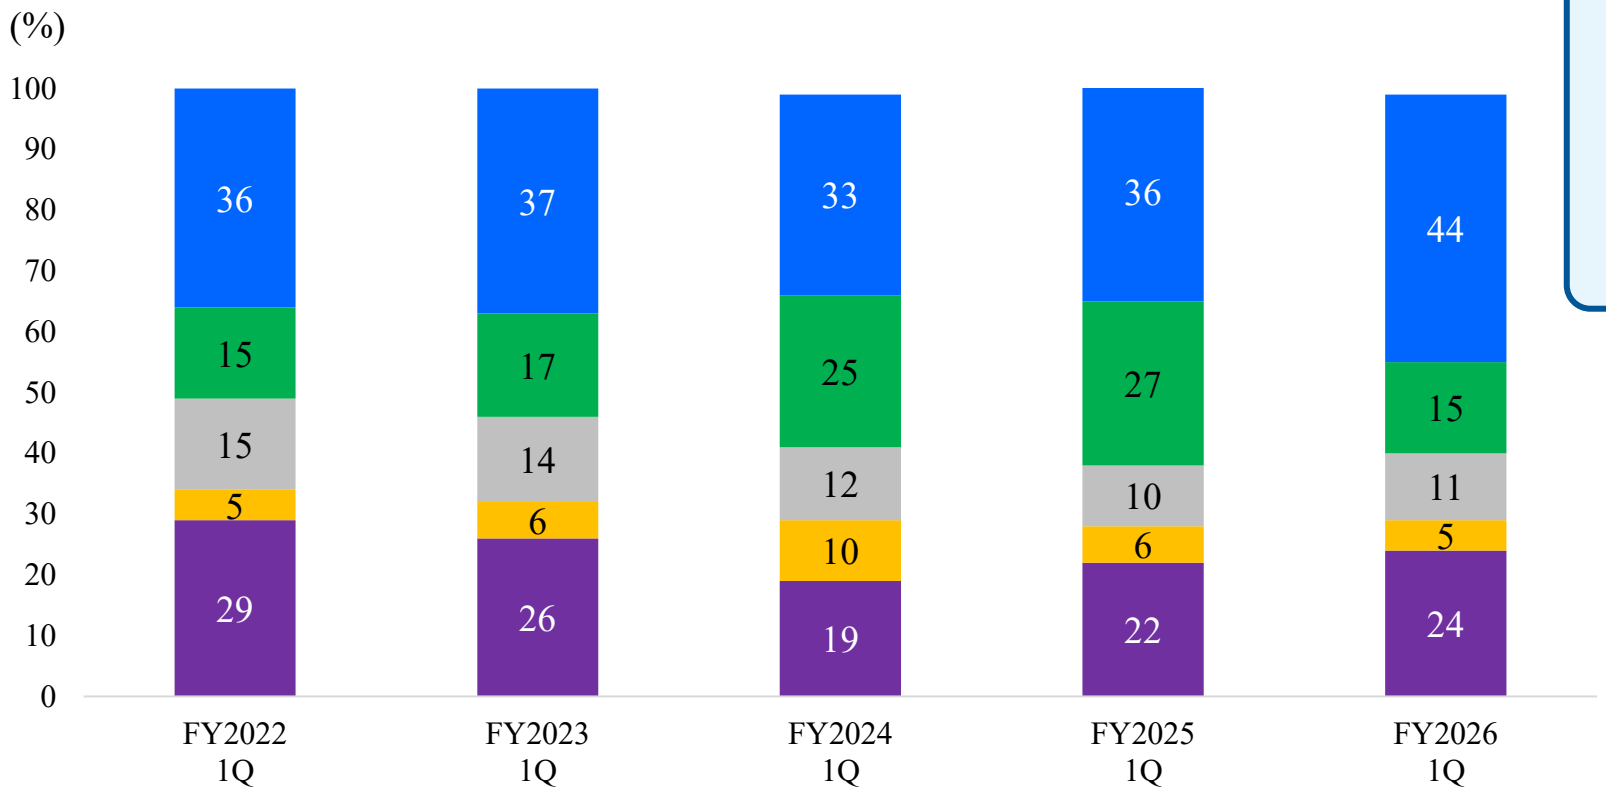
Environmental Conservation and Plant Production Systems

- Orders received decreased compared with the same period of the previous fiscal year, when there were large orders for plant factories. Net sales increased due to the recording of sales from plant factory orders received in the previous fiscal year.

Sales by Market

In the electronic device and equipment market, testing demand related to AI semiconductors remained strong, resulting in a substantial increase.
The automobile market declined significantly due to the postponement of recording sales from large orders to a later period.

Non-consolidated (Equipment Business)



【Relevance to the Target Market】

- AI semiconductors
  →Electronic device and equipment market, Semiconductor market
- Autonomous driving
  →Automobile market
- Satellite communications
  →Electronic device and equipment market

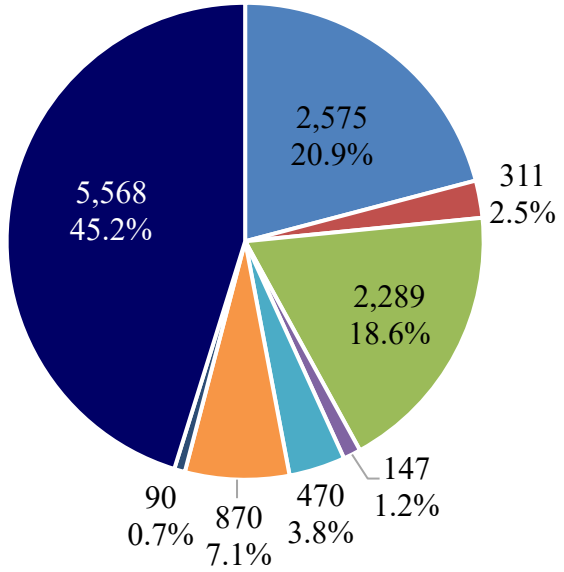
Elcctronic device and equipment market
Automobile market
Semiconductor market
Reserch institute market
Other market

Sales by Region

Net sales increased in North America, China, Southeast Asia & India, Europe, and Taiwan, and decreased in Japan and South Korea.

FY2025 1Q

Overseas sales ratio : 54.8%



Total : 12,323 million yen
Overseas : 6,754 million yen

R&D Expenses	1,521	1,060	1,010	2,070	+36.1%

Main investments

- Fukuchiyama Plant renovation
- Expansion of production area at North American subsidiary

Main R&D activities

- Expand product lineup for the AI semiconductors field (Model changes and lineup expansions for mainstay products)
- Expand environmentally friendly products

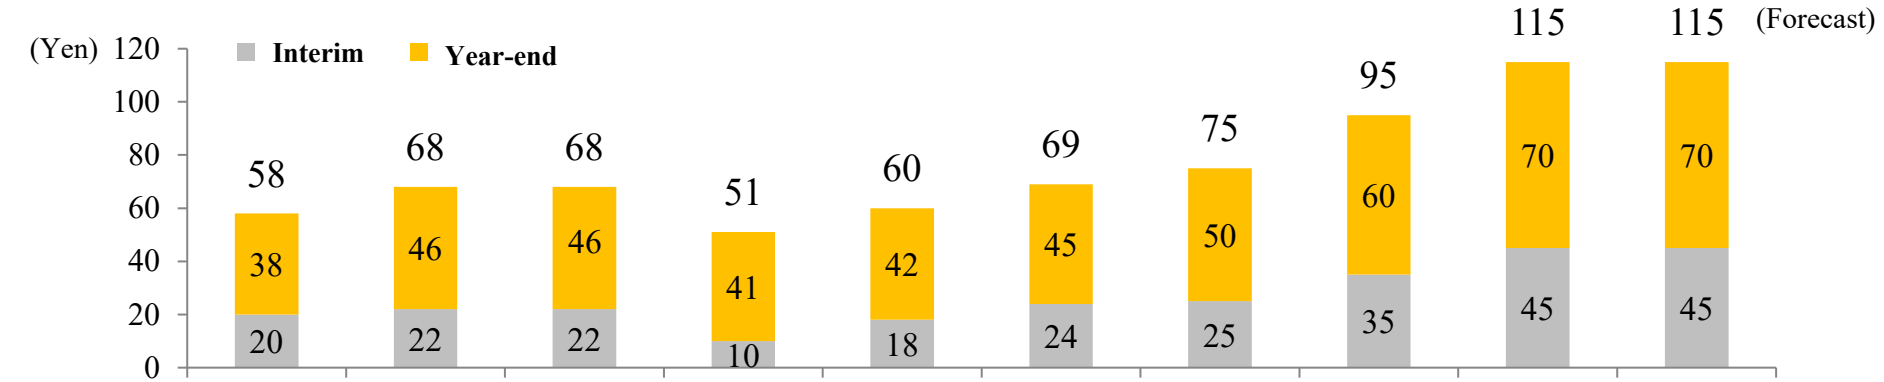
Shareholder Return Policy and FY2026 Dividend Forecast

Shareholder Return Policy

Set the consolidated dividend payout ratio at 40% or more and flexibly carry out acquisition of treasury shares.
During the period of the Medium-Term Management Plan PROGRESSIVE PLUS 2027 (FY2025–2027),
the total return ratio cumulative over the three-year period will be 50% or more, and no dividend reductions will be made.

Dividend per Share and Dividend Payout Ratio/Total Return Ratio

For FY2026, we are forecasting an annual dividend of ¥115 and a dividend payout ratio of 41.2%. On August 6, 2026, we announced a share repurchase (we plan to acquire up to 1,300,000 shares, representing 6.07% of total shares outstanding, for a total of up to ¥6.0 billion, from August 7, 2026 to July 31, 2027). * The FY2026 dividend payout ratio does not take into account the impact of this share repurchase.



(Underlined sections indicate share repurchases by the Company)

Basic policy on treasury share cancellation

The upper limit on treasury share holdings is set at approximately 10% of total shares outstanding, and in principle, any portion exceeding this limit will be cancelled.

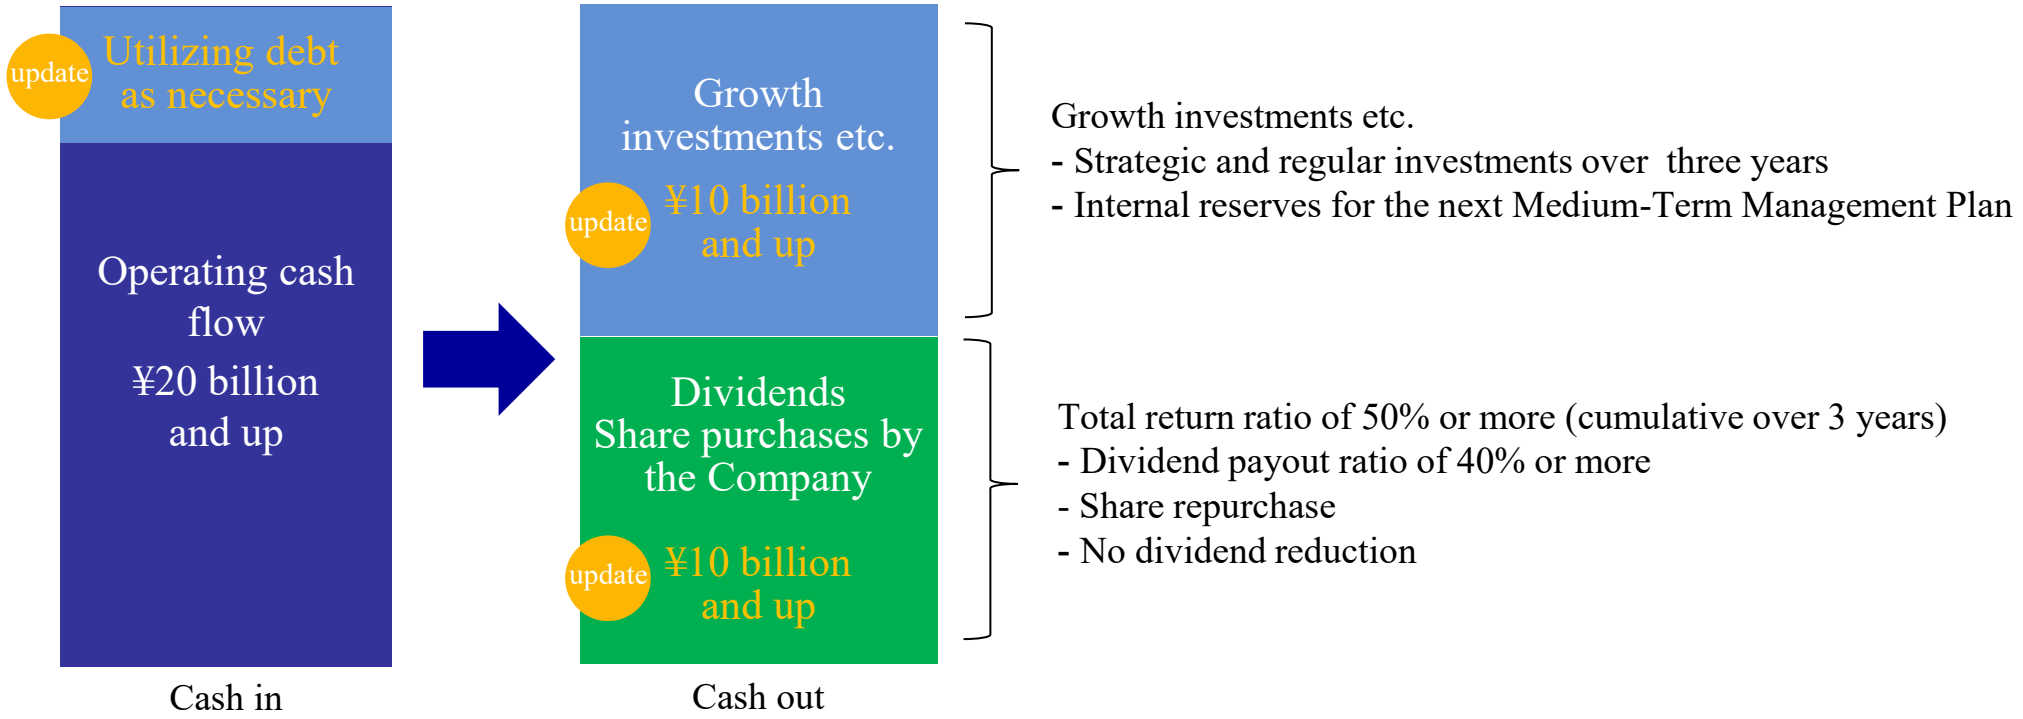
Cash Allocation (FY2025–FY2027)

Cash Allocation Policy

Proactively allocate cash generated over three years to growth investments and shareholder returns

※Updated in May 2026

With an emphasis on capital efficiency, use debt as needed for growth investments and enhancing corporate value.
As part of shareholder returns, we will also flexibly consider and execute share repurchases.



Realize Management Conscious of Cost of Capital and Stock Price

Disclosed on May 14, 2026

Update on Measures to Realize Management Conscious of Cost of Capital and Stock Price.
Enhance capital profitability through strengthening the financial capital strategy, and aim to achieve the medium-term management plan target of ROE of 12% or more in FY2027.

Policies

* Underlining indicates the content updated in May 2026.

- Aim to achieve (net sales of ¥76.0 billion yen, operating profit of ¥9.1 billion yen, operating profit ratio of 12.0%, profit of ¥6.7 billion yen, and ROE of 12.0% or more) under the Medium-Term Management Plan “PROGRESSIVE PLUS 2027”
- Generate cash through improvement of the operating profit ratio and efficiency of total assets, while also utilizing debt as necessary
- Engage in balance sheet management with a focus on capital efficiency, using an equity-to-asset ratio of 70% or less and on-hand liquidity of within three months as indicators to control capital
- Aggressively invest in growth and return profits to shareholders based on the three-year cash allocation policy

Main Initiatives

(1) Increase profitability	Implement a growth strategy targeting the AI semiconductors, autonomous driving, and satellite communications fields, strengthen profitability
(2) Financial strategies	Optimize inventories and reduce trade receivable, and control capital
Shareholder returns	Implement proactive shareholder returns based on the shareholder return policy (P.15)
(3) Enhance IR activities	Enhance dialogue with shareholders and investors to improve reputation in the stock market and strengthen management

Main Business Initiatives in FY2026

Equipment Business

- Exploration of new needs and acquisition of business opportunities in target markets.
- Development and market launch of high value-added products that meet testing requirements.
- Shortening of product lead times by improving ease of customization.

Global Strategy

Japan : Strengthening sales activities in AI semiconductors and satellite communications, and capturing replacement-demand opportunities.

North America: Strengthening sales in satellite communications and driving earnings growth by increasing production capacity.

China : Strengthening sales in semiconductors, electronic components and devices.

Service Business

After-sales service : Expansion of maintenance contract services, cost reduction through improved utilization rates.

Laboratory testing services: Securing orders for semiconductors, as well as aerospace-related equipment, and improving profitability.

Main ESG Initiatives in FY2026

■ E for Environment

- Advancing the 8th Mid-Term Plan on the Environment Plus II (FY2026–2027)
  Strengthening measures against global warming, promoting biodiversity conservation, promoting resource circulation and strengthening chemical substance management, and enhancing disclosed information (CDP, TCFD, TNFD)

■ S for Society

- Establishing a vision-realization-oriented HR system and promoting internal communication
- Introducing a work-sharing system and promoting health and productivity management
- Commencing operation of a stock compensation system for employees in management assistant positions

■ G for Governance

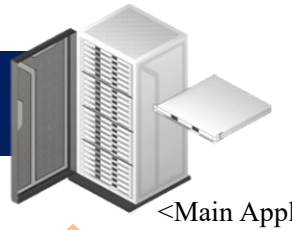
- Strengthening Group governance
- Implementing supply chain risk measures
- Strengthening risk management

【AI Semiconductor Market, Data centers】
Servers, Semiconductors, Electronic components, Electronic materials

As generative AI spreads throughout society, demand is increasing for environmental testing aimed at evaluating the reliability of AI servers and the semiconductors, storage devices, electronic components, and electronic materials that comprise them.

Data centers

AI Servers



<Main Customers>
- Server manufacturers
- High-performance computing (HPC) manufacturers

<Main Applications>
Durability (environmental resistance) evaluation
Reliability evaluation

For AI Servers:
Walk-in Temperature & Humidity Chamber for High Heat-generation Loads

Semiconductors, storage

GPUs, memory, logic

<Main Customers>
- Semiconductor manufacturers
- Foundries

<Main Applications>
Accelerated stress testing
Screening (inspection)

Rapid-rate Thermal Cycle Chamber

Electronic components

Capacitors, semiconductor boards, power supplies

<Main Customers>
- Electronic component manufacturers
- Semiconductor board manufacturers

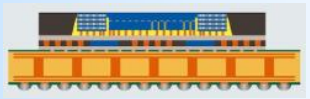
<Main Applications>
Electrical characteristic evaluation (conductivity, etc.)
Operational testing

Highly Accelerated Stress Test System (HAST Chamber)

Measurement & Evaluation System

Electronic materials

Board materials, insulating materials



<Main Customers>
- Material manufacturers (base materials, resist materials, molding materials, etc.)

<Main Applications>
Material property evaluation (moisture absorption, etc.)
Storage testing

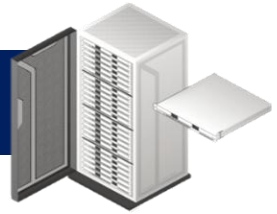
Burn-in Chamber

【AI Semiconductor Market, Data centers】
Optoelectronic Integration Technology (Co-Packaged Optics, CPO)

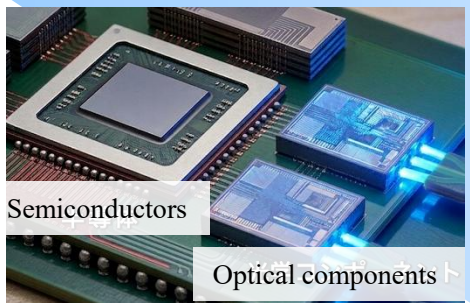
Co-packaged optics (CPO) integrates semiconductors and optical communication components on a common package substrate.
This technology is gaining attention for reducing server power consumption and increasing communication speeds.
Demand for environmental testing is also growing for the development and reliability evaluation of optical components and packaging technologies.

Data centers

AI Servers



Optoelectronic Integration Technology (Co-Packaged Optics)



Semiconductors and optical components integrated on the same package substrate

Semiconductors
GPU・CPU

<Main Customers>
- Semiconductor manufacturers
- Foundries

<Main Applications>
Package reliability evaluations

Thermal Shock Chambers

Rapid-rate Thermal Cycle Chambers

Optical components
Modulators, detectors, connectors

<Major customers>
- Electronic component manufacturers
- Electric cable manufacturers

<Main Applications>
Durability evaluations (temperature and humidity)
Reliability evaluations

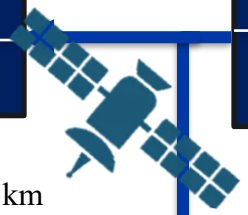
High-power Temperature & Humidity Chamber

Bench-top Type Temperature (& Humidity) Chambers

【Satellite Communications Market】
Artificial satellites (Low earth orbit), Satellite-mounted equipment and components

In the field of commercial satellite communications technology led by private operators, demand is increasing for environmental testing to evaluate the reliability of low earth orbit (LEO) satellites and communication equipment, semiconductors, and electronic components installed in artificial satellites.

Artificial satellites
Low earth orbit (LEO) satellites



Altitude: Several hundred to 2,000 km
Ground coverage area: Radius of several hundred km

<Main Customers>
- Communications satellite manufacturers

<Main Applications>
Durability (environmental resistance) evaluation
Reliability evaluation

HALT/HASS Testing System

Satellite-mounted equipment
Power supplies, communication equipment, attitude control systems

<Main Customers>
- Power supply equipment manufacturers
- Communication equipment manufacturers
- Observation equipment manufacturers

<Main Applications>
Durability (environmental resistance) evaluation
Reliability evaluation

Constant-pressure Temperature & Humidity Chamber MZ Series

Thermal Shock Chamber

Satellite-mounted components
Semiconductors, solar panels, batteries

<Main Customers>
- Semiconductor manufacturers
- Electronic component manufacturers
- Battery manufacturers

<Main Applications>
Qualification testing
Screening (inspection)

High-power Temperature & Humidity Chamber

Walk-in Chamber

TOPICS 1

New Products for the AI Semiconductor Markets

AMR-SPM

Low-Current Conductor Reliability Evaluation System

- In July 2026, we launched the AMR-SPM Low-Current Conductor Reliability Evaluation System which detects minute resistance fluctuations at low currents.
- Supports the reliability evaluation of fine wiring and joints, including microvias and interposers, used in advanced packaging development.

AMR-SPM
Low-Current Conductor Reliability Evaluation System

AMI-SPM

Low-Voltage Insulation Reliability Evaluation System

- In July 2026, we launched the AMI-SPM Low-Voltage Insulation Reliability Evaluation System which detects insulation degradation in the low-voltage range with greater accuracy.
- Supports the application of low voltages of 10 V or less, used in advanced packages and evaluate insulation degradation occurring in the low-voltage range.

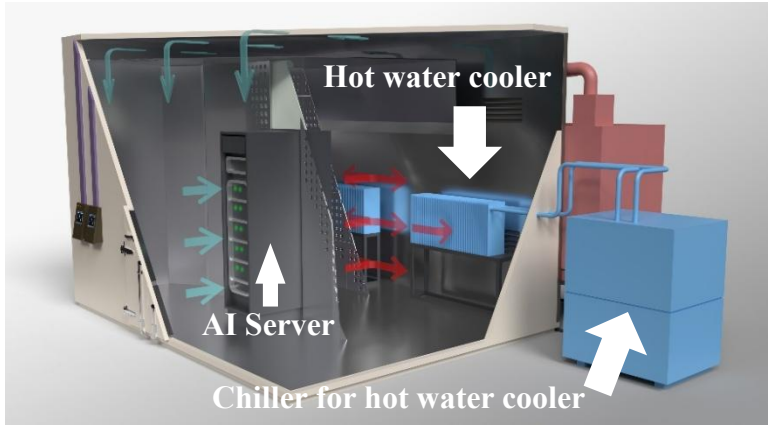
AMI-SPM
Low-Voltage Insulation Reliability Evaluation System

New Products for the AI Server Markets

Walk-in Temperature & Humidity Chamber for High Heat-generation Loads

- In December 2025, we launched two models designed to handle high heat-generation loads for AI server reliability testing.
- Our proprietary control system provides precise temperature and humidity control to support heat-generation loads of 30 kW and 60 kW generated by servers.
- Enables testing compliant with ASHRAE standards used for server reliability evaluation.

【A look inside the test area】



Newly developed air-conditioning system for improved energy and space savings

Walk-In Temperature & Humidity Chamber for High Heat-Generation Loads

TOPICS 3

Kobe R&D Center, a hub for biodiversity preservation activities
Received the Prime Minister's Award for Distinguished Service in the 2026 Greenery Promotion Campaign

- In April 2026, Kobe R&D Center received the Prime Minister's Award for Distinguished Service in the 2026 Greenery Promotion Campaign.
- The site features a forest of approximately 30,000 native trees planted and nurtured by employees, rooftop green space featuring plant species native to the northern Rokko region on the roof of the Technology Development Building, and a biotope consisting of two ponds and a stream.
- In October 2023, the site was certified as a "Natural Symbiosis Site" by the Ministry of the Environment, and registered as an OECM in the international database*.
