To evaluate the effectiveness of the Board of Directors during FY2022, all members of the Board of Directors and Audit & Supervisory Board filled out a questionnaire-style self-evaluation regarding its organization, functions, and conduct, as well as the support it had received. The Company conducted follow-up interviews with members based on their responses to the self-evaluation. The Board of Directors met in April 2022 to evaluate the outcome.

As a result, it was judged that the effectiveness of the Board of Directors as a whole has been secured based on the confirmation that the Board had put in place an organization for fulfilling its function of supervising management, and that conditions within the Board contributed to discussions and exchanges of opinions in a free, uninhibited and constructive manner.

Meanwhile, the Board of Directors confirmed the need to work on further enhancing, utilizing and providing timely information about proposals on agendas, as issues that must be addressed going forward. Looking ahead, we will continue to have discussions from various perspectives and endeavor to further improve the Board's effectiveness.
