ESPEC CORP. has been assessed by and registered in the Quality Management System based on the International Standard ISO 9001:2015 (JIS Q 9001:2015) through the JSA Solutions Co.,Ltd.

ISO 27001
JIS Q 27001

The organization of these certificates is ESPEC Group Japan.

ESPEC CORP. Japan.

ESPEC CORP. Japan.

ESPEC CORP. Japan.
High performance and reliability come in a compact package, for a wide range of temperature/humidity testing needs.

Continuing improvement in the design of constant-temperature (and humidity) cabinets now add ethernet connection, which allows you to control and monitor the cabinet remotely, from a pc via web browser.

The lineup consists of six models, with two size variations, 105 liters and 206 liters, and four temperature/humidity ranges, to accommodate your needs.

To minimize our chambers potential environmental impact

R-449A is the best alternative to R-404A

*R-449A is available on request
Characteristics

- **Superior stability**
  
  With their highly efficient refrigeration system and outstanding thermal insulation, ESPEC’s constant climate cabinets are ideal for use in laboratories and research facilities. They offer a wide temperature/humidity range, and create a stable cabinet environment with a temperature gradient/variation in space of temperature 5°C.

- **Patented cross-output control system reduces required power**
  
  The LHU-124 model’s cross-output control system lowers the maximum current during operation, reducing the amount of required power.

- **Using sampling data**
  
  Sampling data (temperature set point and process value) can be copied via a USB memory device or recorded directly. It is also possible to copy program patterns between cabinets without using a PC, enabling effective use of data.
  
  * USB memory is not included.

- **Global Safety Standards**
  
  ISO 12100 (Safety of machinery)
  IEC 60204-1 (Low voltages)
  IEC 61000-6-2, EN 55011 (EMC)
**Quick access button**

Star mark (⭐️) on the top right corner can be customized to have instant access to any pages you frequently use, to start registered test program, etc.

**Information**

When the water tank is full, message “Water tank full” is shown on the operation screen. There are information need to be notified to the operator, the Accessory button will switch to Information button. By pressing the button, you will find notifications such as “Water tank is full”, “Check Humidity Tray” and “Check Wet Bulb Wick”.

**1 pattern 12 steps**

The controller allows you to register 3 constant operation patterns or 1 program operation patterns with maximum of 12 steps.

---

**N-Instrumentation (LHU-114/124)**

| Setting range  | • Constant setup 3 patterns  
                  Setting range:  
                  Temp.: (Lowest attainable temp. −25°C) to  
                  (Highest attainable temp. +90°C), 0.1°C unit  
                  Humidity: 0%rh to 100%rh, 1% unit  
                  • Program setup 1 pattern (12 steps)  
                  Setting range:  
                  Temp.: (Lowest attainable temp. −25°C) to  
                  (Highest attainable temp. +90°C), 0.1°C unit  
                  Humidity: 0%rh to 100%rh, 1% unit  
                  Time: 0 hour and 1 min. to 9999 hours and 59 min. 1 min. unit |
| Language       | English, Japanese                                           |
| External memory function | Interface USB 2.0 standard compliant (A-type connector)  
Supported functions:  
• Write sampling data, Read/Write program (application software: Patten Manager Lite)  
• Backtrace output  
• Add-ons/system updating |
| Web function   | Interface: Ethernet port (100base-TX)  
Web applications: monitoring, setting, operation, data recording, maintenance setting, email alert |
Remote monitoring and control (Ethernet connection)

You can connect the cabinet to your local area network. By doing so, you can control and monitor the cabinet from any computer on the network, using a web browser. You can program test patterns, start and stop the operation without you actually being at the site.

Email alert

When an alarm is triggered, an e-mail is sent to the registered PC or mobile address. A notification can also be sent at the time of test completion. Set the recipient mail address from the Maintenance setting screen.

*Requires an intranet environment capable of sending emails.

Editing program patterns and displaying graphs

The program patterns registered in the chamber can be edited via web browser and sampling data can be displayed as graphs. Using the PC application “Pattern Manager Lite”*, program patterns on a PC can be edited, displayed as graphs or output as CSV data even if offline.

Network

Test Navi (https://www.test-navi.com/eng/index.html)

The Pattern Manager Lite software allows you to edit programs for your cabinet, view and edit data as graph, etc. The software can be downloaded from the Test Navi website.

TEMPERATURE & HUMIDITY CONTROL RANGE

NOTE: The LH-114 is not equipped with a dehumidifying refrigerator. Therefore, the temperature and humidity control range, especially the low humidity range shown here, may fluctuate depending on the conditions of installation and environment (such as ventilation, fluctuations in ambient temperature, and other factors).

*1 This service is designed specifically for use on smartphones. It will also work on some tablets. Operation has been confirmed in the Safari and Google Chrome browsers. Use the camera function of your smartphone or tablet to read the 2D codes. Recommended environment:  
- OS: iOS 14 or higher, Android 9.0 or higher  
- Browser: Safari (latest version), Google Chrome (latest version)  
- Even if you meet the above conditions, this service may not operate normally on your terminal. Not all Android terminals support AR. For details on terminals that support AR, access the following URL.  
https://developers.google.com/ar/devices?hl=en

*2 Precautions:  
- These contents can be used free of charge, but you will be charged communication fees to access them.  
- Possible causes for the contents not being displayed properly include the camera capturing a location with no flat surfaces, objects being present on the flat surfaces, and insufficient brightness in the location.  
- This service may not operate properly due to the communication environment.  
- Before using AR to capture images, thoroughly check the surrounding area to make sure it is safe.

*3 Initially, models are displayed with roughly their actual sizes. Stretch and pinch to change the dimensions of displayed models. Use this service only as a reference. It does not provide any guarantees for actual installation of chambers.

*4 Temperature and humidity type is displayed in AR as a representative image. Operation panel and test area senor of temperature type is different from the image.
OPTIONS

Portable tank
Approx. 18L (not available for LU).

Inner door
Glass door provided inside the cabinet to observe the conditions of the specimens.

Additional cable port
Provided in addition to the standard cable port (left side).
- ø25 mm
- ø50 mm
- ø100 mm
* Cabinet performance may be affected when equipped with a cable port.

Cable port rubber plug
Comes with the cable port.
- for ø25 mm
- for ø50 mm
- for ø100 mm

Shelf/Shelf bracket
Equivalent to standard accessory.

I/O Interface
Communication ports to connect the cabinet to a PC.
- RS-485
- RS-232C
- GPIB

Communication cables
- RS-485 5 m / 10 m / 30 m
- GPIB 2 m / 4 m

Recorder output terminal
This terminal outputs the temperature and humidity in the test area.

Thermocouple
Attached to specimen to measure specimen temperature.
Thermocouple type T (Copper/Copper-Nickel)
- 2 m
- 4 m

Specimen power supply control terminal
Shuts off the power to the specimen if an equipment problem occurs while testing the power supply to the specimen.
* When applying voltage to a specimen, be sure to use the specimen power supply control terminal option.

Cabinet stand
Stand designed to facilitate specimen loading/unloading from the test area (except LHU/LU-124).
Size: W750 x H700 x D800 mm

Casters
4 casters, with leveling feet

Safety precautions
- Do not use specimens which are explosive or inflammable, or which contain such substances. To do so could be hazardous, as this may lead to fire or explosion.
- Do not place corrosive substances in the cabinet. If corrosive substances are generated by the specimen, the life of the cabinet may be significantly shortened specifically because of the corrosion of stainless steel and copper and because of the deterioration of resin and silicon.
- Do not place life forms or substances that exceed allowable heat generation.
- Be sure to read the user’s manual before operation.

Some photographs listed in this catalog contain Japanese display.
Bench-top models run on a standard voltage for single phase, enabling easy installation anywhere

- **Premium design with a space-saving footprint**
- **Quiet operation, suitable for offices and small labs**
- **Integration with other test equipment**

</table>

1° The performance values are based on IEC 60068-3-5:2001 for the temperature chamber, IEC 60068-3-6:2001 for the humidity chamber. Performance figures are given for a +23°C ambient temperature, 65% rh, rated power supply and no specimens inside the test area. However, the lowest attainable temperature is given for a max. ambient temperature of +30°C. Heat-up time is the achieved time from lowest temperature to highest temperature within temperature range.

2° Excluding protrusions.

3° At ambient temperature +23°C.

4° Compliance with CE marking or UKCA marking.
